Homework

- Reading

    o Numerical stability from Sait's notes ([here](#))

    o Raschka (p60..p75 in 3rd Edition)

    o Hands on Machine Learning Logistic Regression (p142..p147)

- Coding

    o Build a classifier to classify setosa irises from non-setosa (see reading)

        ▪ In Python/Numpy (fine to repurpose the code from this lecture, using two features)

        ▪ Also in Keras/TensorFlow 2
